Giving YWCA Pool a Clean Start

Eleven scuba divers from the Saginaw Underwater Explorers Club took a pool-side break during the annual house-cleaning of the YWCA swimming pool. After a faulty filter system for the pool was rebuilt, the Underwater Explorers volunteered to inspect and scrub the pool as a service project. Normally, the pool is drained and cleaned by a professional cleaning firm every year. The divers did the same chore in a one-night stand Wednesday and the pool is back in operation today.
